

## **BIOPSY WOUND CARE INSTRUCTIONS**

- 1) Keep bandage on for 24 hours. Then remove bandage and shower as usual.
- 2) Keep biopsy site clean and apply thin layer of aquaphor or Vaseline. Then cover with new bandaid. Repeat steps 1 and 2 for one week.
- 3) If you have stitches in your biopsy site, repeat steps 1 and 2 but make follow-up appointment for stitches to be removed.
- 4) If your biopsy site becomes red, tender, or swollen, please call our office 579-4239.
